

GST InvoiceNow Requirement

7 May 2024

Overview of GST InvoiceNow Requirement

InvoiceNow is Singapore's nationwide e-invoicing network based on an international standard called "Peppol". It was introduced by the Infocomm Media Development Authority ("IMDA") in 2019. InvoiceNow enables businesses to easily send and receive invoices in a structured digital format. This digital invoicing method reduces the need for manual processing and recording of invoices in accounting systems, which in-turn helps businesses avoid tedious work and errors.

To support the InvoiceNow initiative and as part of IRAS' ongoing transformation efforts to join the wider e-invoicing ecosystem and to integrate tax into taxpayers' accounting and payroll systems, **GST-registered businesses will be required to use InvoiceNow solutions to send invoice data to IRAS for tax administration.** Invoices that are not issued using InvoiceNow (e.g. for sales made via point-of-sale systems) should also be recorded in InvoiceNow solutions and sent to IRAS.

This is in line with government trends worldwide to actively promote the adoption of e-invoicing for tax administration.

Phased adoption of GST InvoiceNow Requirement

To allow sufficient lead time for businesses, GST-registered businesses will be required to transmit invoice data to IRAS using InvoiceNow solutions via the InvoiceNow network. This new requirement will be implemented progressively:

- From **1 Nov 2025**, for newly incorporated companies that voluntarily register for GST.
These will be companies that are incorporated within 6 months from the time they submit their GST registration application.
- From **1 Apr 2026**, for all new voluntary GST-registrants, regardless of incorporation date.

A soft launch for early adoption will commence from **1 May 2025**, allowing all existing GST-registered businesses to transmit invoice data voluntarily to IRAS using InvoiceNow solutions via the InvoiceNow network.

IRAS will continue to consult industry partners and carefully review the feedback received before announcing further details for the remaining GST-registered businesses.

InvoiceNow Solutions

InvoiceNow solutions are accounting software that allow the transmission of invoices between businesses via the InvoiceNow network. These software can be purchased off-the-shelf or be customised specifically for businesses in the form of proprietary enterprise resource planning systems.

InvoiceNow solutions will help you connect to IRAS through Access Points. This connection will enable the transmission of your business' invoice data to IRAS via Application Programming Interface (API) technology. When you activate the feature to transmit your invoice data to IRAS, IRAS will receive a copy of the invoice data whenever you issue or receive invoices via the InvoiceNow network, or when you record other invoices into the InvoiceNow solutions.

A list of InvoiceNow solutions is attached in the **Appendix**.

To help businesses defray the cost of adoption and utilisation of InvoiceNow, IMDA has introduced a variety of grants, such as the LEAD Connect & Transact Grant and InvoiceNow Transaction Bonus. Co-funding under the Productivity Solutions Grant are also given for InvoiceNow solutions. Please refer to the IMDA website for more information on InvoiceNow grants.

Benefits of using InvoiceNow Solutions

Using InvoiceNow solutions offer the following advantages:

- a. **Streamlined processes:** InvoiceNow solution enables direct transmission of e-invoices in a structured data format across different finance systems, thereby eliminating manual work involved in the sending, receipting and recording of invoices into systems.
- b. **Reduced errors and costs:** InvoiceNow solution reduces manual processes, along with errors and rectification costs. With invoice records maintained electronically, it also reduces invoice storage and retrieval costs.
- c. **Improved cashflow management:** InvoiceNow facilitates quicker invoice processing and payment, helping businesses to more effectively manage their cashflow.

GST-registered businesses are required to maintain good record-keeping controls and accounting processes. By adopting InvoiceNow solutions, businesses can fulfil these responsibilities.

Businesses can also benefit from reduced compliance efforts when preparing data for submission to IRAS.

Scope of GST InvoiceNow Requirement

Businesses under the GST InvoiceNow Requirement are required to transmit to IRAS invoice data relating to the following transactions:

- Standard-rated supplies¹
- Zero-rated supplies
- Standard-rated purchases on which input tax claims are made or will be made²

¹ *Excluding reverse charge supplies*

² *Excluding reverse charge purchases*

For point-of-sale supplies data and petty cash purchases data, businesses can choose to aggregate the transactions before transmitting to IRAS.

Invoice data is to be transmitted to IRAS at the earlier of the filing due date of the relevant GST return or the date in which the relevant GST return (i.e. the GST return with an accounting period pertaining to the time of the supply of the invoice/the date shown on the supplier's tax invoice) is filed.

Overseas entities (including overseas vendors that are registered under the Overseas Vendor Registration regime and business registered under the Reverse Charge regime are however, exempted from the GST InvoiceNow Requirement.

Preparing early to adopt GST InvoiceNow Solutions

Businesses are encouraged to come onboard early and plan ahead for the adoption of InvoiceNow solutions or make changes to your in-house accounting systems to be compatible with GST InvoiceNow Requirement.

IRAS recommends taking the following steps:

From now

Step 1: Ensure that your solution is InvoiceNow-enabled

- For businesses with existing accounting or finance solutions, or businesses that are planning to purchase one, check whether your preferred solution is listed on [IMDA's pre-approved e-invoicing solution provider list](#). You may also consider adopting free solutions with basic InvoiceNow capabilities.
- For large enterprises using your own in-house solutions, get in touch with [an IMDA pre-approved Access Point Provider](#) to help you to connect to the InvoiceNow network.

Step 2: Register for InvoiceNow and Obtain your Peppol ID

- Approach your Solution Provider and/or Access Point Provider to register your business in the [SG Peppol Directory](#) with your UEN and obtain your Peppol ID.

From May 2025

Step 3: Ensure that your InvoiceNow solution is connected to IRAS' System via API

- Contact your Solution Provider and/or Access Point Provider to ensure that your InvoiceNow solution is connected to IRAS via API.

Step 4: Activate feature and transmit invoice data to IRAS

- Work with your Solution Provider and/or Access Point Provider to enable the feature for you to transmit invoice data to IRAS.
- Test your system implementation and ensure that you are able to transmit invoices to IRAS successfully.
